Key distinctions include:

- Purpose: Support internal decision-making rather than external reporting.

- Strategic Management and Balanced Scorecard

Let's explore each in detail.

Cost Behavior and Cost Analysis

Understanding how costs behave in response to changes in activity levels is fundamental. Garrison Noreen categorizes costs into:

- Fixed Costs: Remain constant regardless of activity level (e.g., rent, salaries).
- Variable Costs: Change proportionally with activity (e.g., raw materials, direct labor).
- Mixed Costs: Contain elements of both fixed and variable costs.

Application in managerial accounting:

- Cost-Volume-Profit (CVP) Analysis: Determines how changes in production volume affect profitability.
- Contribution Margin Analysis: Identifies the amount remaining after variable costs to cover fixed costs and generate profit.
- Cost Estimation Techniques: Includes high-low method, scatter plots, and regression analysis to predict costs at different activity levels.

Garrison Noreen stresses that accurate cost behavior analysis enables managers to set appropriate sales targets, pricing strategies, and cost control measures.

Budgeting and Forecasting

Budgeting serves as a financial blueprint for organizational goals. Garrison Noreen advocates for a comprehensive approach that involves:

- Master Budgets: Consolidated financial plan covering all aspects?sales, production, capital expenditures.
- Flexible Budgets: Adjusted for actual activity levels to evaluate performance accurately.

- Providing benchmarks for performance evaluation.
- Supporting strategic decision-making.

Garrison Noreen highlights that effective budgeting requires collaboration across departments and ongoing variance analysis to identify deviations and implement corrective actions.

Performance Measurement and Variance Analysis

Measuring performance is critical for maintaining operational efficiency and accountability. Garrison Noreen emphasizes the importance of:

- Standard Costs: Predetermined costs based on historical data or engineering estimates.
- Variance Analysis: The process of analyzing differences between actual and standard costs or

budgets, including:

- Efficiency Variance: Reflects the efficiency of resource utilization.

Key performance indicators (KPIs):
