- Market conditions at the time of comparison influence results

3. Asset-Based Approach

This approach values a company based on the net asset value, often used for asset-heavy or liquidation scenarios.

Features:

- Sum of the company's assets minus liabilities
- Adjustments for asset impairments or fair value

Pros:

- Useful for companies with significant tangible assets
- Suitable for liquidation valuations

Cons:

- Less relevant for service or technology firms
- Ignores intangible assets like brand or intellectual property
