Cities and Mega Cities Problems and Solutions Strategies

Urbanization is one of the most defining phenomena of the 21st century, with more than half of the world's population now residing in cities. While cities serve as engines of economic growth, innovation, and cultural exchange, they also face a plethora of complex challenges that threaten their sustainability, livability, and resilience. As urban areas continue to expand, particularly mega cities with populations exceeding 10 million, the need for comprehensive, adaptive solutions becomes ever more urgent. This article delves into the myriad problems faced by cities and mega cities, analyzing their root causes, and explores strategic solutions to foster sustainable urban development.

Major Problems Faced by Cities and Mega Cities

Urban areas are dynamic ecosystems, but they often grapple with interconnected issues that can undermine their functionality and quality of life.

1. Overpopulation and Congestion
